

2023 IEEE INTERNATIONAL CONFERENCE ON

# Metrology for eXtended Reality, Artificial Intelligence and Neural Engineering

MILANO, ITALY / OCTOBER 25-27

## Youth Program

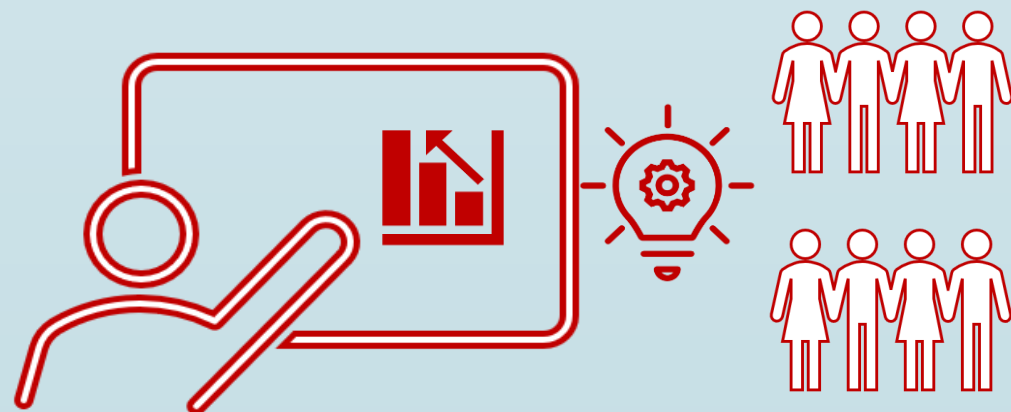

# IEEE MetroXRINE

The **Youth program** is a double-event which will be during IEEE MetroXRINE 2023 for the youngest attendees of the Conference. The participation to each event will give the possibility to obtain special prizes.

The first event will be a **Contest** for MSc students, PhD students and young researchers (under 36 years old) who want to test their skills.

Please stay tuned to be updated on this event!

The second event is the **Youth Forum**, a poster session where PhD students and young researchers will present their research themes and topics. This is an opportunity to exchange ideas with your peers, expand your networks and introduce your research to international students and researchers.

Youth Program Chairs:

Dr. Alfonso Maria Ponsiglione ([alfonsomaria.ponsiglione@unina.it](mailto:alfonsomaria.ponsiglione@unina.it))

And

Dr. Carlo Ricciardi ([carlo.ricciardi@unina.it](mailto:carlo.ricciardi@unina.it))
