

PhD Program

#MetroXRINE2022

The **PhD program** is a double-event which will be held on the 28th of October at 9.00 a.m. for the youngest attendees of the Conference.

The first event is the **Neural Data Processing Contest** for both MSc and PhD students who want to test their skills in data analysis. A special prize will be given to the participant who performs the best classification on a dataset acquired through the **Helmate** headset provided by **Abmedica**. The guidelines to participate will be provided within the end of July on the website of the event.

The second event is the **PhD Forum**, a poster session where PhD students will present their research themes and topics. This is an opportunity to exchange ideas with your peers, expand your networks and introduce your research to international students and researchers.

The chairs of the PhD program invite all the PhD students to participate also to **Dx4health**. For more information, please refer to the website of the event (<https://metroxraine.org/dx4healt>).

PhD Program Chairs: Dr. Alfonso Maria Ponsiglione (alfonsomaria.ponsiglione@unina.it) and **Dr. Carlo Ricciardi** (carlo.ricciardi@unina.it)
